taking care of  
your dental health

# Tomorrow

feeling the benefits in your overall health

**Dental health:** Why it matters,  
today and tomorrow

Did you know that your dental health can impact your overall health? It's a fact. Brushing, flossing and having regular dentist visits help keep your smile healthy, inside and out. Reducing the amount of harmful plaque and bacteria released into your bloodstream today reduces your risk of developing conditions such as coronary heart disease, stroke and diabetes later.<sup>1</sup>
