

# Medication Coverage Changes

for 2026

These are the changes we're making to the Cigna Healthcare® Prescription Drug List in 2026. Changes are listed by drug list name and state; and medications are listed in alphabetical order (A-Z) by the type of change taking place. Use the chart below to find what page your drug list is on.

If you have Cigna Healthcare benefits and are affected by one of these changes, we'll send you a letter with next steps. You can also view the 2026 drug list at [Cigna.com/ifp-drug-list](https://Cigna.com/ifp-drug-list).

\* This medication is covered under the Cigna Healthcare medical benefit.

Generic medications are listed in all lowercase letters and brand-name medications are listed in all CAPITAL letters.

1. If your doctor feels a different medication isn't right for you, your doctor's office can ask us to cover this medication. Ask your doctor's office to contact us to start the coverage review process or to appeal the denial of coverage. Your doctor's office knows how the process works and will take care of everything for you. If you don't get approval and continue to fill this medication on or after January 1, it won't be covered. You can still fill it (without using your plan/insurance), but you'll pay its full price at the pharmacy counter. And, if you do this, your costs can't be applied to your annual deductible or out-of-pocket maximum.
2. If you currently have approval (prior authorization) from Cigna Healthcare for this medication to be covered, we're changing that approval. As of January 1, you'll no longer have approval (prior authorization) to fill the brand-name medication. Instead, **your approval will only be for the other biosimilars that treat your condition**, which your plan will cover until your current approval period ends.
3. **If you currently have approval (prior authorization) from Cigna Healthcare for this medication to be covered, your plan will continue to cover it through December 31 (or the date you were approved through), whichever comes first.** After that time, it will no longer be covered.
4. If you currently have approval (prior authorization) from Cigna Healthcare for this medication to be covered, we're changing that approval. As of January 1, you'll no longer have approval (prior authorization) to fill the brand-name medication. Instead, **your approval will only be for its generic version**, which your plan will cover until your current approval period ends.
5. There are some medications and products that your plan won't cover for any reason because they're a "plan (or benefit) exclusion." This means the medication or product isn't on your drug list, and there's no option to ask us to cover it through our review process. For example, your plan doesn't cover (or "excludes") medications that the U.S. Food and Drug Administration (FDA) hasn't approved.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care provider, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, customers are required to use an in-network pharmacy to fill the prescription.

Product availability may vary by location and plan type and is subject to change. All health insurance policies and health benefit plans contain exclusions and limitations. For costs and details of coverage, review your plan documents or contact a Cigna Healthcare representative.

Cigna Healthcare products and services are provided exclusively by or through operating subsidiaries of The Cigna Group, including Cigna Health and Life Insurance Company, Inc.
